Westfield Medical offer a comprehensive range of packaging approaches for healthcare facilities and for medical device industry. We provide sterilisation pouches, reels, bags and wraps in all sizes. We have been manufacturing sterilisation packaging for fifty years and have built our reputation for delivering consistent high quality.

Westfield Medical is a leader in sterilisation packaging because we work with our customers. We understand that each product requires a unique solution to deliver both safety and cost effectiveness. Whatever you need, Westfield Medical can deliver the right packaging for your product.

Westfield Medical was founded in 1968 to provide innovative packaging solutions for the healthcare industry. Over the past 50 years, we have grown into a leading British manufacturing company that provides full sterile barrier solutions, and we sell to over 70 countries world-wide.

While the company's services and operations have expanded, our underlying principles have remained constant. We are proud to celebrate our 50-year milestone with our employees, clients, and partners - and look forward to the next 50 years!

Our business puts customers first

Sales

Our Sales Managers will provide a dedicated service looking after *all* your requirements from ensuring you have the best value products for your needs to assisting with pricing, delivery timings and the whole buying process.

Customer Services

Our professional and proactive customer services department is key to providing you with best responsiveness in the market. We will deal with your queries, resolve issues where necessary and provide a friendly and helpful assistance throughout.

Quality Assurance

Our products are manufactured under a Quality Management System certified to ISO 13485 and ISO 9001. Products comply with ISO 11607 and EN868 parts 1-10 as appropriate.

Certifications

Westfield Medical pouches, reels and bags are BSI certified and Kite Marked sterilisation packaging products. This internationally recognised quality symbol reinforces our commitment to compliance with standards.

Stock control & distribution

Located between Bath and Bristol in Southwest England our dedicated manufacturing unit benefits from good access to motorways and airports. We have a worldwide distribution network across Europe, America, the Middle East and the Asia-Pacific and are committed to meeting customer needs by offering our standard product range or customised bespoke products. Our aim is always to achieve complete customer satisfaction through providing world-class product quality, reliable on-time delivery and excellent service.

50 years of medical packaging excellence

Production

From receipt of order through to despatch of goods, all product specifications and process routes are prepared and controlled using our unique computer software systems. This minimises delays and provides increased flexibility ensuring a fast response to customer requirements. In house manufacturing includes 5 colour, flexographic printing, producing customer specified designs on a variety of materials.

These include plain, crepe, registered adhesive and all over coated papers, coated and uncoated Tyvek and a variety of co extruded and laminated materials.

Memberships

Westfield Medical is an honoured member of the Sterile Barrier Association (SBA) who are dedicated to the promotion and development of single use sterile barrier products.

We are also members of the Institute of Decontamination Sciences (IDSc). This is the UK's largest professional body representing those involved in the decontamination of reusable invasive medical devices, furthermore, the company is proud to be a member of The Central Sterilising Club (CSC). This is the only club solely devoted to all aspects of sterilisation, disinfection and decontamination and applied microbiology.

Famos CSSD devices and equipment

The company have had a long association with Famos and are an approved distributor of the Famos range of heat-sealing machines, baskets, trays and packing tables.

Humipak Pouches

Moisture Retention Pouches for Post-Operative Instrument Handling

Shorten your pre-washing time up to 70% and save money. Westfield Medical's patented Humipak pouch helps to increase efficiency on reprocessing used instruments and offers a convenient and reliable way to comply with the requirements of HTM 01-01 and WHTM 01-01 with regard to the need to ensure a continuously moist environment for instruments between use and reprocessing.

- ◆ Not intended for sterilisation or washing
- ◆ Available in blue and four self-seal sizes
- ◆ Manufactured under ISO 9001 and ISO 13485 Quality Systems
- ◆ 4 sizes suitable for DIN, Double-DIN, Half-DIN Baskets and smaller instruments
- ◆ Patents granted No: US13/643,069, AUS2011244793, ZL2011 8 0031188.0
Patent applied No: EU11723584.6
- ◆ To meet the requirements of HTM01-01, SHTM01-01 and WHTM 01-01

Peel+ Sterilisation Pouches

Premium quality flat and gusseted pouches

This Peel+ Pouch uses stronger base materials to give improved puncture resistance, shatterless film and an excellent fibre-free peelability characteristic.

Comprising of a multi-layer film and 70gsm paper this provides an exceptional clean peel and improved seal strength

Features:

- ◆ A multi layer heat sealable 12/40 PET/PP film
- ◆ Available in a range of sizes to suit your requirements
- ◆ Chevron shaped end with thumbholes for ease of opening
- ◆ 3 sided sealed with a ribbed pattern to 70gsm medical grade paper
- ◆ Suitable for steam and EO sterilisation and printed with class 1 process indicators
- ◆ Clear change of indicators makes it easy to distinguish between processed and unprocessed products

Benefits include:

- ◆ Minimising the risk of contamination from fibres into the atmosphere and on the device itself with cleaner peel characteristics
- ◆ The ability to present the product aseptically with a fibre free peel
- ◆ Improved puncture resistance with the use of stronger paper than Westfield's standard products
- ◆ All indicators and text prints are within the seals avoiding the risk of ink contamination onto the device.

These pouches are produced in a class 8 cleanroom and are manufactured under ISO 9001/ISO 13485 Quality System, CE and BSI Kite Mark.

Peel+ Sterilisation Reels

Flat and Gusseted premium quality sterilisation reels

Best in class peel quality

This Peel+ Reel uses stronger base materials to give improved puncture resistance, shatterless film and an excellent fibre-free peelability characteristic.

Comprising of a multi-layer film and 70gsm paper this provides an exceptional clean peel and improved seal strength.

Features:

- ◆ A multi layer heat sealable 12/40 PET/PP film
- ◆ Available in a range of sizes to suit your requirements
- ◆ 2 sided sealed with a ribbed pattern to 70gsm medical grade paper
- ◆ Suitable for Steam, EO and Formaldehyde sterilization and printed with class 1 process indicators
- ◆ Clear change of indicators makes it easy to distinguish between processed and unprocessed products

Benefits include:

- ◆ Minimising the risk of contamination from fibres into the atmosphere and on the device itself with cleaner peel characteristics
- ◆ The ability to present the product aseptically with a fibre free peel
- ◆ Improved puncture resistance with the use of stronger paper than Westfield's standard products
- ◆ All indicators and text prints are within the seals avoiding the risk of ink contamination onto the device.

These reels are produced in a class 8 cleanroom and are manufactured under ISO 9001/ISO 13485 Quality System, CE and BSI Kite Mark.

SupaT

Non-barrier transport wrap

Features:

- ◆ 60 gsm spunbonded transport wrap to protect sterile barrier wraps during handling and distribution
- ◆ Dual-color wrap, purple and orange, for colour coding purposes. Dual colour reduces the number of product lines required and therefore helps to reduce inventory and related cost and space requirement.
- ◆ Supplied either as single sheets or interleaved with green 55 gsm SMS
- ◆ High porosity to facilitate efficient steam penetration and to avoid wet loads
- ◆ Extremely strong and durable material helps to reduce the risk of returned sets

Supasorb 40 Tray Liner

Non woven material capable of absorbing seven times its own weight in water, locking it in its own porous structure and preventing the moisture from adversely affecting the efficiency of the steam sterilisation process.

- ◆ High visibility blue and non glaring
- ◆ Manufactured under ISO 9001 and ISO 13485 Quality System
- ◆ Standard sizes available to fit the most popular dimensions of trays
- ◆ Excellent mechanical properties to withstand handling and sterilisation
- ◆ Low linting and lightweight, making it exceptionally easy to handle-even in bulk

Supasorb Creped Tray Liner

Supasorb is a finely creped cellulose material of 80gsm, 120gsm and 140gsm. The high absorbency and rapid dispersion ensures condensate is removed during autoclaving and will achieve improved effectiveness of the sterilisation process.

Features:

- ◆ White colour
- ◆ Offering very high absorbency
- ◆ Manufactured under ISO 9001 and ISO 13485 quality systems
- ◆ Excellent mechanical properties to withstand handling and sterilisation
- ◆ Available in a range of sizes optimised to fit most popular sizes of trays
- ◆ Facilitate the wrapping and packaging of medical instruments and devices

Supasorb Tray Liners 120gsm and 140gsm

Supasorb 120gsm and 140gsm Tray Liner is manufactured from heavier medical papers and may also be used underneath sterilisation trays to offer additional protection to the underside of the pack and will disperse condensation to reduce the risk of wet packs.

Compatible with steam, Ethylene Oxide and Gamma sterilisation processes.

Count Sheet Pouches

How safe is your surgical checklist?

Medical Grade paper pouch

Simply fold the count sheet over to fit inside the pouch. Attach the pouch to the side of the pack or tray by using the self-adhesive strip on the reverse and the fold line to hold the count sheet firmly in place.

- ◆ Medical grade 60gsm paper
- ◆ Blue PVA based autoclave-resistant adhesive
- ◆ Conforms to BS EN ISO 11607-1 and BS EN 868-3
- ◆ Manufactured under BS EN ISO 9001 and BS EN ISO 13485
- ◆ Double sided self-seal tape with a silicone coated paper backing

Product Code	Size (mm)	Pack Quantity
CSFP150100	150 x 100	1000

Film Front Pouch

This pouch features 2 strips of self adhesive tape on the reverse for fixing to the pack. The clear polyester film allows for quick visual confirmation that the count sheet is present.

- ◆ Medical grade 60gsm paper
- ◆ Polyester Polypropylene 12/50 laminated film
- ◆ Double sided self seal tape with a silicone paper backing
- ◆ Conforms to BS EN ISO 11607 and BS EN 868-3
- ◆ Manufactured under BS EN ISO 9001 and BS EN ISO 13485

Tray Belts and End Caps

Protecting the integrity of tray wraps

- ◆ Protects against sharp objects
- ◆ Ideal for heavy instrument sets
- ◆ Compatible with Steam sterilisation processes
- ◆ Provides cushioning, allowing steam to pass through
- ◆ Prevents abrasions, rips and tears caused by dragging trays

Tray Belts

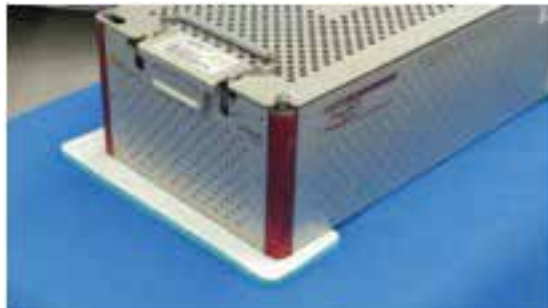

Tray Belts are designed to be used around the outside of a wrapped tray to prevent abrasion and tears caused by dragging the tray, or from contact with sharp objects or edges. The product consists of medical grade paper and open-cell foam, providing cushioning whilst allowing steam to pass through.

Product Code	Size (mm)	Pack Quantity
FPTN7530	75 x 30m	8 rolls

End Caps

NoDrip end caps are designed to be used beneath a tray to prevent rips and tears caused by sharp edges or protruding feet. The product consists of medical grade paper, which helps to wick moisture away from the tray and open-cell foam, providing cushioning whilst allowing steam to pass through.

Famos PROTEC Rotary Heat Sealers

Perfection in every detail

With the need for medical devices to be securely packed and sealed for sterilisation and validation requirements, Westfield Medical has launched a new range of PROTEC heat sealers by Famos.

All hospitals and medical device manufacturers are constantly striving for perfection in sterility. An important aspect of this is the sterilisation of instruments and single use disposables. Although sterilisation is important, maintaining sterility for a fixed period of time after the process is just as important. In order to ensure that the sterility is maintained for a long period of time it is crucial that the packaging is perfectly sealed.

The new Famos PROTEC heat sealers have been developed with a completely new design while offering the same reliability and high quality that the Famos brand is associated with.

The F108, F110 and F220 Series

The new range is divided into 3 different models: The F108, the F110 and the F220 are all available with an automatic transport start, reverse transportation and a production counter with an alarm. The F108 PROTEC series are the entry models within the Famos range, but at the same time they are the most sophisticated models currently available in the market. The F110 and F220 PROTECT models are available with 1 or 2 internal printers, which enables them to print packing dates, expiry dates, codes, text, barcodes and seal parameters.

Benefits include:

- ◆ Temperature, speed and pressure
- ◆ Data storage - meaning the operator has historic records
- ◆ The range can be fully validated in accordance with ISO 11607-2
- ◆ An Ethernet connection to monitor multiple sealers in a network environment
- ◆ The ability to monitor the parameters in real time using an external PC monitoring program
- ◆ Monitoring during every seal – if one of these is outside the parameter limits, the machine alerts the operator and stops sealing

Seal Test Strip

Heat sealer validation and seal test quality

- ◆ Easy to use
- ◆ Conforms to ISO 11607-2
- ◆ Authentication of seal integrity
- ◆ Reduced wastage of pouches and reels
- ◆ Documentary evidence for future internal and external audits
- ◆ Easily identifiable if one of the heat seal parameters is not functioning correctly

Product Code	Pack Quantity
SEALTEST	250

User guide for heat sealer validation and seal test quality

1. Set the temperature of the heat sealer to suit the packaging material being sealed.

2. Place the Famos Seal Test Strip in a pouch or reel and pass the dark area of the Famos Seal Strip through the machine.

3. Once processed through the machine check the quality of the strip. The seal must be darker than the environment throughout.

4. If the seal is darker than the environment throughout peel back the pouch or reel and fill in the printed form and store for documentary evidence for future internal or external audits.

About Famos

Established in 1946 Famos is a manufacturer of CSSD related equipment and accessories which are sold in more than 50 countries. Famos has proven to be a reliable supplier to small clinics, hospitals and pharmaceutical industries.

On-Site Servicing, Repair and Calibration

Westfield Medical engineers are equipped to carry out on-site servicing, calibration and repairs of Famos heat sealers and sterilisation department equipment.

Famos recommend an annual heat sealer service and calibration. Included in the service is the replacement of the Standard Service Pack of parts. This consists of the rubber transport belts, the Teflon insulation strips on the brass heating bars and the Teflon rubbing strips on the aluminium guide bars.

Why is this important?

If these parts are not replaced, tiny particles of rubber, brass and aluminium could contaminate any packaging material passing through the machine.

Servicing and Calibration

On-Site Service Contract - 1 visit p.a. includes Labour and Standard Service Pack*
Calibration and Certification - during service visit
Call Out - engineer to visit site
Hourly rate - on-site

* Additional charges will apply for parts and labour outside of the Standard Service Pack.

Multi Machine Contract Discounts

2 or more machines
4 or more machines

The discounts are only applicable when the services are carried out during the same visit.

If the existing service/calibration dates are staggered then the first service will be charged Pro Rata to bring the service dates in line with each other.

Loan Machines

Rental F100 Series
Rental F200 Series

Notes:

Off hire is effective on receipt at Westfield Medical Ltd.
All damages to be paid for in addition to the rates above.
